Student Feedback System

1. Introduction

The **Student Feedback System** is a lightweight web-based application developed using **PHP**, **MySQL**, **HTML**, and **CSS**. It facilitates feedback collection from students regarding various academic subjects across semesters. Additionally, it includes an admin portal to review and manage submitted feedback data. This project demonstrates practical implementation of secure login, form handling, and basic frontend-backend communication.

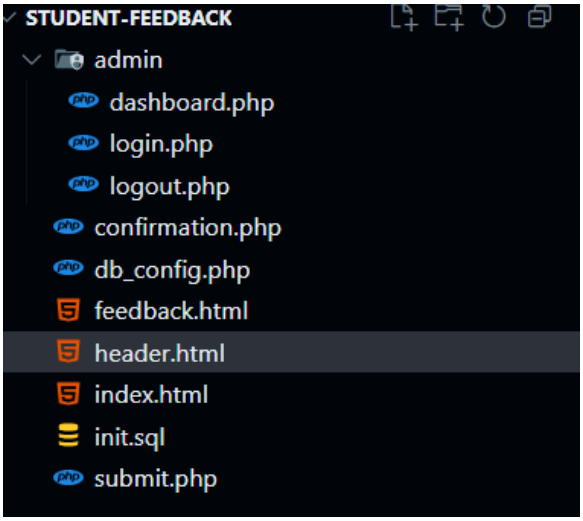
2. Features

- Display subject lists categorized by semesters (Sem 1 to Sem 8).
- Student feedback submission interface.
- Admin login and logout system with session handling.
- Admin dashboard to view and analyze feedback.
- Responsive design compatible with mobile and desktop.

3. Technologies Used

- **Frontend:** HTML, CSS (custom responsive styling)
- **Backend:** PHP
- **Database:** MySQL
- **Styling Frameworks:** CSS Flexbox and custom media queries

4. Directory Structure



5. Sample Code

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8" />
  <meta name="viewport"
     content="width=device-width, initial-
     scale=1.0"/>
  <title>Student Feedback System</title>
  <style>
    :root {
      --bg-light: #e3f2fd;
      --primary-color: #3f51b5;
      --primary-dark: #303f9f;
      --accent-color: #ff5722;
      --accent-dark: #e64a19;
      --text-dark: #212529;
      --text-muted: #6c757d;
      --white: #fff;
    }
  </style>
</head>
<body>

  <div id="header"></div>

  <div class="hero">
    <div class="container">
      <div class="poster">
        Welcome to the <span>Student
      Feedback System</span>
      </div>
      <p class="subtitle">Your Opinion
      Matters. Help Us Improve!</p>

      <a href="feedback.html" class="btn btn-
      feedback">Give Feedback</a>
      <a href="admin/login.php" class="btn
      btn-admin">Admin Login</a>
    </div>
  </div>

  <footer>
    &copy; 2025 Student Feedback System.
     All rights reserved.
  </footer>
```

```
  <script>
    fetch("header.html")
    .then((response) => response.text())
    .then((data) => {

      document.getElementById("header").inner
      HTML = data;
    })
    .catch((error) => console.error("Error
      loading header:", error));

  </script>
 </body>
</html>
```

6. Conclusion

The Student Feedback System simplifies the process of collecting and managing student feedback. It offers a user-friendly interface for students and a secure admin panel for managing data. This project lays a strong foundation for improving academic quality through structured feedback and can be expanded with more features in the future.
